Professional Summary

App and web developer with a background in technical support, client service, and visual design. Builds practical Android and Flutter apps and responsive websites for small businesses, taking ideas from requirements and UX design through implementation, testing, and iteration. Skilled at turning real workflows and complex technical needs into approachable products.

Experience

Independent App & Web Developer | Self-Employed | Kansas City, KS 2026-Present

- Design and build mobile apps, operational tools, and responsive websites for small businesses and individual clients.
- Translate client workflows and brand goals into clear requirements, prototypes, production code, and iterative releases.
- Developed a custom bid-cost tracker for a small-business owner and portfolio websites for artisan, author, and professional-service clients.
- Maintain a growing portfolio of Android, Flutter, and web products, including beta-tested mobile software and experimental launcher interfaces.

Technical Support Specialist | Sunlighten | Overland Park, KS 2025-2026

- Helped sauna owners troubleshoot technical issues by phone, email, and video.
- Used wiring diagrams to diagnose electrical and control issues, document steps, and guide owners through repairs.
- Recorded case details and routed parts, warranty, and advanced technical issues to the appropriate team.

High Speed Internet Sales & Technical Consultant | Google Fiber | Kansas City, MO 2022-2023

- Explained networking and connectivity concepts to residential and business customers and assisted with hardware setup, router configuration, and troubleshooting.
- Consistently exceeded targets through a consultative, customer-focused technical selling approach.

Media Specialist | Life Time Fitness | Chanhassen, MN 2018-2019

- Managed AV hardware, workstations, and production software for a multi-site enterprise and produced training webinars and technical documentation.
- Provided professional headshot photography and photo editing.

Selected Product & Client Work

- **Wide** - Flutter-based Android editor for designing seamless Instagram carousels on a continuous canvas; currently in beta testing on Google Play.
- **dot.o Launcher & dot.o Orbit** - Home-screen and foldable multitasking concepts; Orbit uses spatial columns, focus-centered navigation, and automatic tiling to create a more fluid Android workspace.
- **Bid Cost Tracker** - Purpose-built small-business app that turns a real estimating workflow into a simpler digital tool.
- **Tom Steinke artisan website** - Responsive portfolio experience showcasing custom signage, architectural metalwork, process, and project photography.
- **Four Nature Logs** - Book website for a co-created nature, bird, bug, and rock log series, with content designed for families, teachers, and homeschool audiences.
- **Professional services website** - Accessible, responsive site for a Kansas City voice and speech-language professional, with clear service and booking information.
